

RUST-OLEUM®, WHY BETTER?

In a typical maintenance project the cost of paint make up only 20% of the total cost. Use RUST-OLEUM® and save on the other 80% !

RUST-OLEUM® product philosophy

Each RUST-OLEUM® product has been developed to make your job easier and should therefore meet at least one of the following features:

■ Reducing preparation time

Thanks to the high surface tolerance of most RUST-OLEUM® coatings, only a minimum of surface preparation is required, saving you time and money.

■ Reducing application time

As many of our coatings incorporate time saving features such as extra high film build per coat, or shorter recoat windows, the job can simply be done quicker.

■ Reducing downtime

A shorter application time means less downtime for your production processes or businesses. And thanks to low solvent, low odour coatings, the work can even continue whilst painting.

■ Longer lifetime

Better quality pigments, resins and higher solids are just some of the features that make our products simply longer lasting than other products on the market.

ColourShop® Local Tinting Service

Our ColourShop® tinting machine allows for quick and easy tinting at local distributors.

Your advantages:
